Florida Fresh Citrus Shipments 2006-07 Annual Report

Purpose

This report provides a summary of fresh citrus shipment data for the 2006-07 season. It contains information on shipments of oranges, grapefruit, Temples, tangelos and tangerines for the domestic and export markets. The report is based on data collected by the Division of Fruit and Vegetable Inspection of the Florida Department of Agriculture and Consumer Services.

The information is tabulated in three ways:

- (1) annually with comparisons of shipments in previous seasons,
- (2) by time period during the shipping season, and
- (3) by major state markets for each variety.

Highlights

The 2006-07 Florida fresh citrus season showed some recovery from the previous hurricane-impacted seasons despite a 6.8% decrease in overall Florida citrus production. Florida fresh citrus shipments totaled 36.8 million 4/5-bushel cartons in 2006-07, up 26.2% from the 29.2 million cartons shipped in 2005-06, but still down 29.3% from 2003-04, prior to the hurricane damage. Tangerine and honey tangerine shipments were down from last season, reflecting a decrease in tangerine production. Fresh orange shipments were up despite a decrease in production.

Both grapefruit production and fresh grapefruit shipments showed a significant increase. Offshore markets accounted for 61.0% of grapefruit shipments and showed an 82.1% increase over last season. Offshore colored shipments increased by 94.8% while white shipments increased by 53.6%. Domestic grapefruit shipments increased 41.0% while shipments to Canada increased 65.8%.

Fresh round-orange and Temple shipments represented 26.9% of the fresh volume. Orange and Temple shipments totaled 9.9 million 4/5-bushel cartons in 2006-07 which represented a 6.3% increase from the previous season. Fresh Tangelo shipments increased 5.0% over last season. Honey tangerine shipments were down 18.8% and other tangerine shipments (including Robinson, Sunburst, Fallglo, etc.) decreased 14.8%.
