Florida Fresh Citrus Shipments 2005-06 Annual Report

Purpose

This report provides a summary of fresh citrus shipment data for the 2005-06 season. It contains information on shipments of oranges, grapefruit, Temples, tangelos and tangerines for the domestic and export markets. The report is based on data collected by the Division of Fruit and Vegetable Inspection of the Florida Department of Agriculture and Consumer Services.

The information is tabulated in three ways:

- (1) annually with comparisons of shipments in previous seasons,
- (2) by time period during the shipping season, and
- (3) by major state markets for each variety.

Highlights

The 2005-06 Florida fresh citrus season was significantly impacted by unprecedented hurricane damage during the last two seasons. Florida fresh citrus shipments totaled 29.2 million 4/5-bushel cartons in 2005-06, down 3.6% from the 30.3 million cartons shipped in 2004-05 and 44.0% from 2003-04, prior to the hurricane damage. Oranges, grapefruit and Temples accounted for the decrease while tangelos, tangerines, and honey tangerines recovered slightly.

Offshore markets accounted for 55% of grapefruit shipments, and showed a 10.8% decrease over last season. Offshore shipments of colored grapefruit decreased by 15.6% while white grapefruit increased by 2.3%. Domestic grapefruit shipments declined 2.1% while grapefruit shipments to Canada were flat.

Fresh round-orange shipments represented 31.1% of the fresh volume, and Temple shipments represented an additional 1.0%. Orange shipments totaled 9.1 million 4/5-bushel cartons in 2005-06, which represents a 7.6% decrease from the previous season. Tangelo shipments increased 4.8% over last season. Honey tangerine shipments were up 17.4% from last season while other tangerine shipments (including Robinson, Sunburst, Fallglo, etc.) increased 3.0%.
