Florida Fresh Citrus Shipments 2000-01 Annual Report

Purpose

This report provides a summary of fresh citrus shipment data for the 2000-01 season. It contains information on shipments of oranges, grapefruit, Temples, tangelos and tangerines for the domestic and export markets. The report is based on data collected by the Division of Fruit and Vegetable Inspection of the Florida Department of Agriculture and Consumer Services.

The information is tabulated in three ways:

- (1) annually with comparisons of shipments in previous seasons,
- (2) by time period during the shipping season, and
- (3) by major markets for each variety.

Highlights

Florida fresh citrus shipments totaled 53.8 million 4/5-bushel cartons in 2000-01, down 7% from the 58.0 million cartons shipped in 1999-00. Tangelo shipments were slightly higher than last season, while all other varieties showed decreases.

Fresh grapefruit shipments accounted for 59% of the fresh volume in 2000-01. Offshore markets accounted for 57% of those shipments, and showed a 2.5% decrease over last season. Offshore shipments of colored grapefruit increased by 2.7% while white grapefruit declined 11.2%. Colored

grapefruit accounted for 45% of shipments to Japan, which has historically been a predominantly white grapefruit market. Domestic and Canadian grapefruit shipments declined 12.1% and .8%, respectively.

Fresh round-orange shipments represented 24.9% of the fresh volume, and Temple shipments represented an additional 1.1%. Orange shipments totaled 13.4 million 4/5-bushel cartons in 2000-01, which represents a 3.7% decline from the previous season. Tangelo shipments increased 1.9% over last season. Honey tangerine shipments decreased 30.9% over last season while other tangerine shipments (including Robinson, Sunburst, Fallglo, etc.) were down 9.2%.
