Florida Fresh Citrus Shipments 2010-11 Annual Report

Purpose

This report provides a summary of fresh citrus shipment data for the 2010-11 season. It contains information on shipments of oranges, grapefruit, tangelos and tangerines for the domestic and export markets. The report is based on data collected by the Division of Fruit and Vegetable Inspection of the Florida Department of Agriculture and Consumer Services.

The information is tabulated in three ways:

- (1) annually with comparisons of shipments in previous seasons,
- (2) by time period during the shipping season, and
- (3) by major state markets for each variety.

Highlights

The 2010-11 Florida fresh citrus shipments were down 6.1% from the previous season compared to a 3.3% increase in estimated overall Florida citrus production. Florida fresh citrus shipments totaled 30.5 million 4/5-bushel cartons in 2010-11, compared to 32.5 million cartons shipped in 2009-10. Tangelos and other tangerine shipments showed an increase while other varieties were down.

Fresh grapefruit shipments were down 11.7% in the domestic market and 4.6% in the Canadian market. Both colored and white shipments decreased in the domestic and Canadian

markets. Offshore markets accounted for 58.0% of grapefruit shipments and were down 11.8%. Offshore colored grapefruit shipments declined 12.4% while white decreased by 9.9%.

Fresh round-orange (including Temples) shipments represented 29.4% of the fresh volume. Orange shipments totaled 9.0 million 4/5-bushel cartons in 2010-11 which represented a decrease of less than 1% from the previous season. Fresh tangelo shipments increased 7.2% over last season. Honey tangerine shipments were down 16.0% and other tangerine shipments (including Robinson, Sunburst, Fallglo, etc.) increased 14.6%.
